Hip and Thigh Conditions Mini -DBQ (Disability Benefits Questionnaire)

Please specify the condition and also indicate the side left (L) or right (R), you are diagnosed with:

Osteoarthritis	☐ L ☐ R	Hip Joint Replacement	☐ L ☐ R
Iliopsoas tendinitis	☐ L ☐ R	Femoral neck stress fracture	☐ L ☐ R
Avascular Necrosis	☐ L ☐ R	Ankylosis of hip joint	☐ L ☐ R

Trochanteric pain syndrome *(includes trochanteric bursitis)* ☐ L ☐ R

Femoral acetabular impingement syndrome *(includes labral tears)* ☐ L ☐ R

Other *(specify):*

Please answer the following questions regarding your disability:

a) When and how did you experience the first symptoms of your disease?

b) How does this condition affect your daily life and work (walking, sitting, pain)?

c) Did the symptoms worsen with time? Does anything make the symptoms worse?

d) Do you experience flare-ups (worsening of conditions)? If so, how do the flare-ups affect you (painful, fatigue, weakness etc.)?

Hip and Thigh Conditions Mini -DBQ (Disability Benefits Questionnaire)

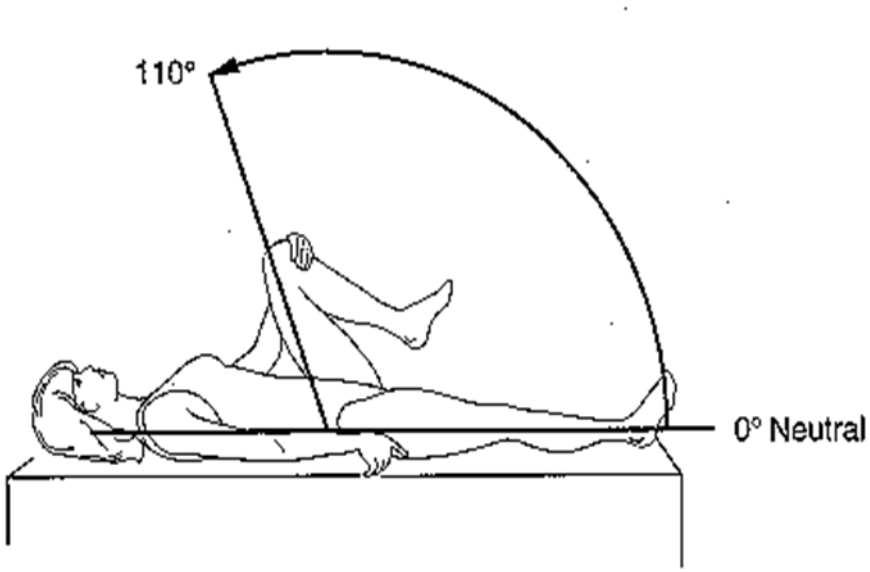

Range of Motion: This determines your disability rating

Range of motion for Hip/s-FLEXION
Begin by lying flat on your back. Bend your knee to a 90-degree angle and pull it towards you as much as you can as shown in the figure to the BELOW

LEFT HIP	RIGHT HIP
To which degree can you pull your knee? (125 degrees is full range of motion):	To which degree can you pull your knee? (125 degrees is full range of motion):

Flare-ups: Think about when it hurts and you experience pain. This number should be LESS than the one above!

LEFT HIP	RIGHT HIP
To which degree can you pull your knee? (125 degrees is full range of motion):	To which degree can you pull your knee? (125 degrees is full range of motion):

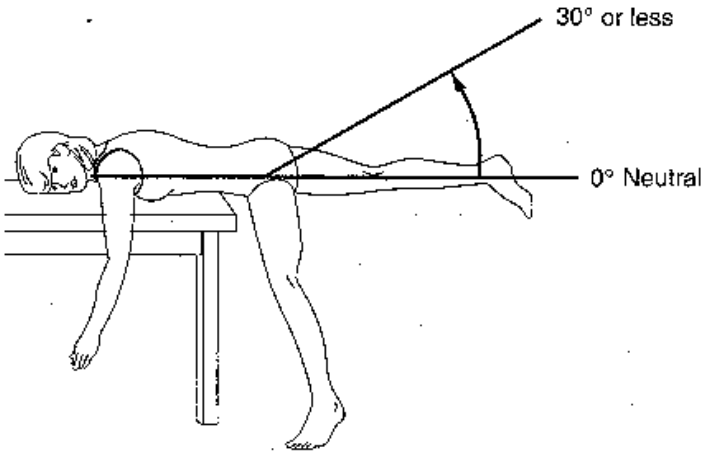

↑ Flexion of Hip

Hip and Thigh Conditions Mini -DBQ (Disability Benefits Questionnaire)

Range of motion for Hip/s- EXTENSION
Begin by lying face down with one leg down and the other one straight as shown in the figure to the right. Start by lift your leg backwards as shown

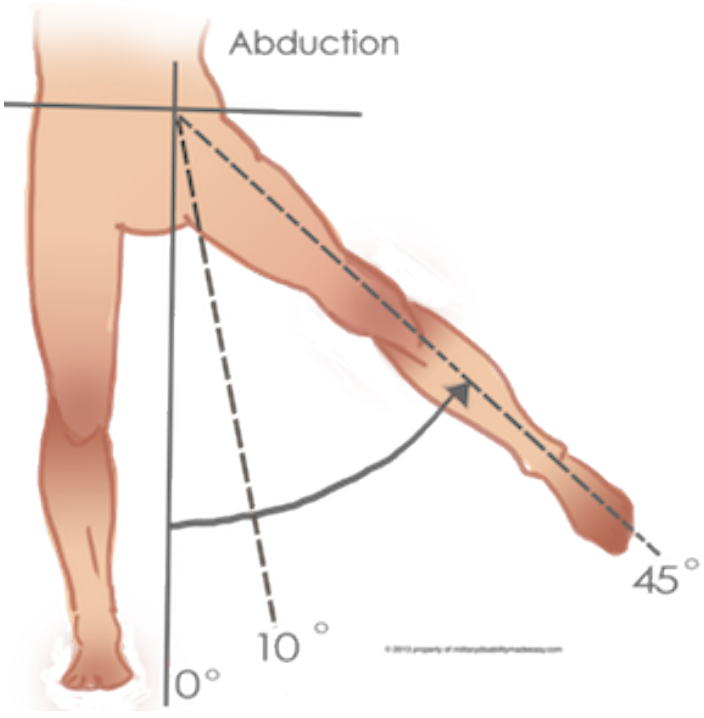

LEFT HIP	RIGHT HIP
To which degree can you lift your leg backwards? (30 degrees is normal ROM):	To which degree can you lift your leg backwards? (30 degrees is normal ROM):
Flare-ups: Think about when it hurts and you experience pain. This number should be LESS than the one above!	
LEFT HIP	**RIGHT HIP**
To which degree can you lift your leg backwards? (30 degrees is normal ROM):	To which degree can you lift your leg backwards? (30 degrees is normal ROM):

↑ Extension of Hip

Range of motion for Hip/s -ABDUCTION
Begin by standing. Move your leg sideways away from your body as far as you can as shown in the figure to the right.

LEFT HIP	RIGHT HIP
To which degree can you move your leg sideways? (45 degrees is full range of motion):	To which degree can you move your leg sideways? (45 degrees is full range of motion):
Flare-ups: Think about when it hurts and you experience pain. This number should be LESS than the one above!	
LEFT HIP	**RIGHT HIP**
To which degree can you move your leg sideways? (45 degrees is full range of motion):	To which degree can you move your leg sideways? (45 degrees is full range of motion):

Hip and Thigh Conditions Mini -DBQ (Disability Benefits Questionnaire)

Range of motion for Hip/s -ADDUCTION Begin by standing. Move your leg sideways towards your body and cross your legs as far as you can as shown in the figure to the right.	
LEFT HIP	**RIGHT HIP**
To which degree can you cross your legs? (25° is full range of motion):	To which degree can you cross your legs? (25° is full range of motion):
Flare-ups: Think about when it hurts and you experience pain. This number should be LESS than the one above!	
LEFT HIP	**RIGHT HIP**
To which degree can you move your leg sideways? (25 degrees is full range of motion):	To which degree can you move your leg sideways? (25 degrees is full range of motion):

Do you have any swelling/Tenderness i.e. pain on touching? *If so, indicate area of swelling:* ☐ Yes ☐ No

Please check all symptoms that apply to you:

- ☐ Incoordination *(impaired ability to execute skilled movements smoothly)*
- ☐ Swelling *(tenderness) (If marked please specify if there is pain on touching the swelling)*
- ☐ Weakened Movement (feeling weakness in muscles)
- ☐ Pain on Movement
- ☐ Easily Fatigued
- ☐ Less movement than normal
- ☐ Atrophy of disuse (decreased muscle mass)
- ☐ Disturbance in movements
- ☐ Interferes with sitting
- ☐ Interferes with standing
- ☐ **Other, explain:**

Hip and Thigh Conditions Mini -DBQ (Disability Benefits Questionnaire)

VERY IMPORTANT: History of Neck Surgery – Provide type of surgery, indicate if VA did surgery or private doctor, and date:

How does this condition affect your working ability? Please describe in detail:
